

**IN THE CLAIMS**

**Claims 1-11, 13, 14, 16-18, and 21-24** are pending.

**Claims 1 and 13** are amended.

**Claim 14** is withdrawn.

**Claims 12, 15, 19, and 20** are canceled.

**Claims 21-24** are newly added.

1. **(Currently Amended)** An apparatus for guiding wire, the apparatus comprising:  
a raceway attachment adapted to attach the end of a raceway;  
a retainer; and  
a wire guide attached to the raceway attachment by the retainer, the wire guide capable of receiving and guiding the wire such that the wire does not contact an end of the raceway;  
at least one spacer adjacent to the wire guide and contacting the raceway attachment.
2. **(Original)** The apparatus of claim 1, wherein the raceway attachment releasably attaches to an outer surface of the end of the raceway.
3. **(Original)** The apparatus of claim 1, wherein the retainer has at least one attachment arm and wherein the wire guide attaches to the raceway attachment by the at least one attachment arm.
4. **(Original)** The apparatus of claim 3, wherein the retainer is resilient.

5. **(Original)** The apparatus of claim 3, wherein the at least one attachment arm hingedly attaches the raceway attachment to the wire guide.

6. **(Previously Presented)** The apparatus of claim 1, wherein the raceway attachment has at least one stop positioned to abut the raceway.

7. **(Original)** The apparatus of claim 1, wherein the raceway attachment has at least one grip.

8. **(Original)** The apparatus of claim 1, wherein the wire guide is configured to guide and retain the wire in abutment with the wire guide.

9. **(Original)** The apparatus of claim 1, wherein the raceway attachment has a friction fit between the raceway attachment and the raceway.

10. **(Original)** The apparatus of claim 1, wherein the raceway attachment is nonabrasive and has a substantially smooth outer surface.

11. **(Original)** The apparatus of claim 1, wherein the wire guide is a pulley.

12. **(Canceled).**

13. **(Currently Amended)** An apparatus for guiding wire, the apparatus comprising:

a raceway sleeve;

a wire guide; and

a retainer attaching the raceway sleeve to the wire guide, the wire guide capable of receiving and guiding the wire such that the wire does not contact an end of a raceway; and

at least one spacer adjacent to the wire guide and contacting the raceway sleeve.

14. **(Withdrawn)** The apparatus of claim 13, wherein the raceway sleeve has a recess for

receiving the wire guide.

15. **(Cancelled).**

16. **(Original)** The apparatus of claim 13, wherein the raceway sleeve has at least one grip.

17. **(Original)** The apparatus of claim 13, wherein the wire guide is configured to guide and retain the wire in abutment with the wire guide.

18. **(Original)** The apparatus of claim 13, wherein the raceway sleeve has at least one stop positioned to abut the raceway.

19 and 20. **(Cancelled).**

21. (New) An apparatus for guiding wire, the apparatus comprising:

    a raceway attachment adapted to attach the end of a raceway;

    a retainer;

    a wire guide attached to the raceway attachment by the retainer, the wire guide capable of receiving and guiding the wire such that the wire does not contact an end of the raceway,

    wherein the retainer has at least one attachment arm and wherein the wire guide attaches to the raceway attachment by the at least one attachment arm, and

    wherein the at least one attachment arm hingedly attaches the raceway attachment to the wire guide.

22. (New) The apparatus of claim 21, wherein the raceway attachment releasably attaches to an outer surface of the end of the raceway.

23. (New) The apparatus of claim 21, wherein the raceway attachment has at least one stop positioned to abut the raceway.

24. (New) The apparatus of claim 21, wherein the wire guide is a pulley.
